

Environmental Policy Statement

Aztec Print (NE) Environmental Policy Statement

Aztec is a printing company offering customers a complete bureau service, design studio, single to full colour printing facilities and full in-house finishing services.

We recognise that our operations result in emissions to air, water, and the generation of waste. It is our aim to reduce the environmental impacts of our business and to operate in an environmentally responsible manner. Our environmental policy applies to all of our operations including management, office services, printing, delivery and procurement.

To achieve our environmental aims Aztec Print has set environmental objectives to continually improve our performance.

We aim to

- reduce solvent consumption and the emission of volatile organic compounds
- reduce the generation of general and hazardous wastes
- endeavour to reduce pollution at source wherever practicable
- ensure all staff work together in a positive manner to help our environmental performance
- and inform all of our customers of our commitment to reducing our environmental impact and encourage their co-operation in selecting environmentally less harmful products

We are committed to complying with all relevant legislation as a minimum and will look for continual improvement within our environmental management system to improve our environmental performance.

Progress towards our environmental objectives will be monitored through our monthly management meetings.

This policy is fully supported by the Managing Director and the management team.

For and on behalf of Aztec Print (NE) Ltd

Lee Redford

Director
